

VELOXPOWER

Technical Services LLC

ABOUT US

WHO ARE WE

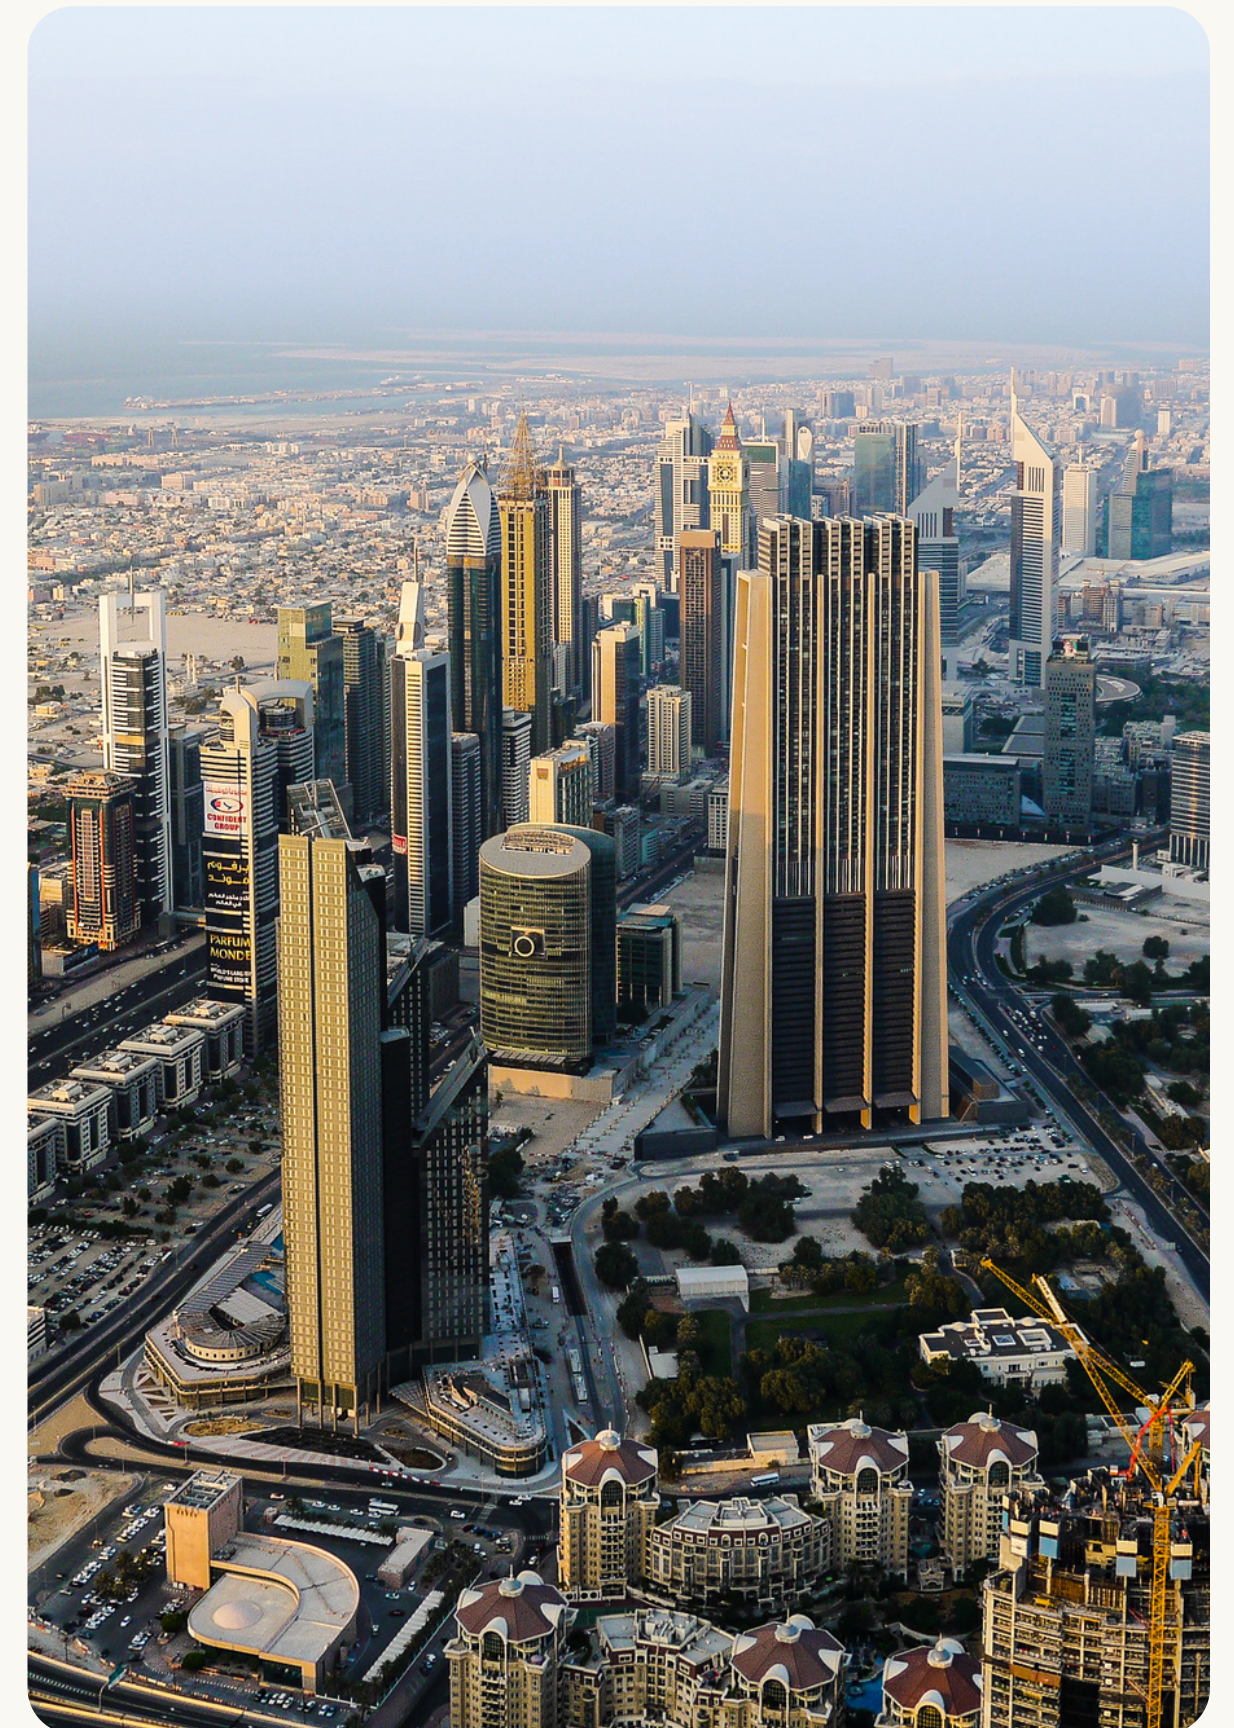

Veloxpower has established itself as a premier provider of electromechanical services in the UAE. With years of expertise in air conditioning, ventilation, landscape lighting systems and all kinds of electrical contracting, we deliver innovative, reliable, and cost-effective solutions for projects of all sizes.

OUR MISSION

To deliver safe, reliable, high-quality electrical solutions through expert workmanship and innovation, while building trusted long-term partnerships.

OUR VISION

To redefine excellence in electromechanical and technical services in the UAE, setting new industry standards through innovation, precision, and sustainability.

OUR SERVICES

Landscape Lighting Systems

Enhance outdoor spaces with our premium landscape lighting systems, designed to illuminate pathways, gardens, and architectural features. We are highly experienced in designing complex landscape electrical systems and offer sophisticated installation services. Our energy-efficient solutions provide ambiance and elegance, tailored to complement any landscape design while being cost effective.

Electrical Contracting

We specialize in comprehensive electrical contracting services, all kinds of LV cable laying, including installation, maintenance, and system upgrades for residential, commercial, and industrial projects. We provide professional EV charger installation services, offering seamless solutions for homes, businesses, and public spaces. Our expert team ensures reliable, safe, and energy-efficient solutions tailored to meet diverse client requirements.

EV Charger Installation & Services

We offer expert EV charger installations and services, providing seamless solutions for both residential and commercial needs. Our team ensures efficient, safe, and compliant installations tailored to your specific requirements. We also offer maintenance and troubleshooting services to keep your chargers running smoothly. With a focus on quality and customer satisfaction, we make transitioning to electric vehicles easy and convenient.
